SUMMARY

M.S. in Business Analytics candidate with demonstrated track record of leveraging analytics knowledge to drive impactful business decisions in diverse industries. Hold MBA degree from top Indian B-school. Hands-on experience analyzing real-world data to generate actionable insights. Adept at articulate communication of recommendations.

TECHINICAL SKILLS

- **Analytics:** Data management, data visualization, market research, mining and segmentation, predictive modeling, process simulation and optimization, network analysis, conceptual data modeling, cost-benefit analysis
- **Tools & languages:** SQL, SAS, R, Python, STATA, TABLEAU, MS Access, C, C++
- **Base SAS Certified Programmer**, pending
- **FLIP** – India's largest industry endorsed certifications, on Banking Business and Retail Banking

EDUCATION

M.S. in BUSINESS ANALYTICS (anticipated graduation in May 2017) **Bentley University, Waltham, MA**

- GPA: 3.85/4.00; straight A's in core analytics classes
- Analytics coursework: Data Science, Machine Learning, Data Mining, Time Series, Multivariate Analysis

MASTER of BUSINESS ADMINISTRATION (2011-2013) **Indian Institute of Management Indore, India**

- Ranked in top 2.5% among 0.2 million students in India's Common Aptitude Test (Indian GMAT)
- Analytics coursework: Business Intelligence, Data Analysis & Decision Making, Consumer Behavior

B.TECH. in ELECTRONICS & COMMUNUCATION (2005-2009) **Sikkim Manipal Institute of Technology, India**

PROJECTS

US Traffic Fatalities Analysis (*Tools: SAS, R*)

- Gained insights into why 2015 brought the biggest percent increase in US traffic deaths by performing exploratory data analysis and statistical modeling using SAS
- Conducted data cleansing, validation and transformation using metadata to improve predictive accuracy
- Developed Shiny web app to display accident reports and interactive dashboards for each state

Boston Hubway Data Visualization Challenge (*Tool: R*)

- Recommended rush hour resource utilization improvements in Hubway's ~500k bike rides and 100+ stations by network analysis using lgraph and R
- Created graph visualizations in Neo4j to simplify complex relationships between stations and trips

Medical Center's Data Management (*Tools: SQL, MS Access*)

- Designed logical data model by documenting database requirements using EER and implementing SQL scripts
- Optimized physician scheduling and streamlined day-to-day operations by creating reports in MS Access

Profitability Analysis of Bike Segment (*Tool: Tableau*)

- Diagnosed root-cause of diminishing US profitability of a bike segment using Tableau visual analytics
- Presented actionable insights to stem losses by leveraging impactful visualizations – stories & dashboards

EXPERIENCE

PRODUCT MANAGER (2013) **ING Vysya Bank, Bangalore, India**

- Created ATM expansion strategy to set up 20 new ATMs by evaluating market attractiveness, segmenting cities and performing profitability analysis to identify target markets
- Developed interactive dashboards to track phone banking division's KPIs
- Proposed upgrade of bank's product offerings by analyzing consumer behavior and trends in service industries

ASSISTANT SYSTEMS ENGINEER (2010-2011) **Tata Consultancy Services, Hyderabad, India**

- Identified and diagnosed performance bottlenecks for a multinational automaker through performance testing

ACTIVITIES & INTERESTS

- Member of Data Lab at Bentley University
- Amateur Indian classical dancer
