

Katherine Noble Dobbins

Software Engineer

Somerville, MA 02143 . katdobbins@gmail.com . +1.413.717.2145

Technologies and Tools:

Python 2	HTML	Django Rest Framework	Amazon Web Services	JIRA
Python 3	CSS	Postman	Linux	Agile Development Methodologies
Django	JavaScript	Vagrant	Git	Scrum
		Docker	Github	

Selected Experience:

MassChallenge, Inc.

Junior Software Engineer

Boston, MA
2016 - 2017

- Worked on a cross-functional scrum-based agile development team. Coordinated with the Product Manager to ship functional and maintainable interfaces. Met with stakeholders to establish the goals for further development and creation of new features and tools.
- Provided user requirements analysis, design and programming support for the Accelerate Platform, used to coordinate 1000s of organizations and people. This included application processes, all judging processes, mentor relationship opportunities, and other operations of a startup accelerator.
- Application development, enhancement, maintenance, and management of technological issues and features for the Accelerate Platform.
- Participated in code review all code changes.
- Maintained automated tests to reflect changes to the Accelerate Platform. Adjusted code to resolve PEP8 complaints.
- Helped initiate and enhance the Impact-API, a new, best practices API module. Initiated internationalization via Django Rest Framework.

Befrugal.com, Capital Intellect, Inc

Software Testing and Front End Development, Senior Operations Associate, Data Entry Associate

Boston, MA
2013 - 2016

- Proposed workflow optimizations, including but not limited to support tool modifications via web-based product-management tool.
- Managed cash back payment inspection. Performed fraud detection via purchase pattern analysis, provided user support for security breaches, troubleshoot user input error for affiliate network purchase inquiries, other payment discrepancies as required.
- Submitted and closed the loop with inquiries via affiliate marketing networks. Added retailers, altering associated terms and conditions as listed.
- Software testing via Basecamp and test server.
- Basic web development utilizing HTML and CSS.

S. E. Shires Inc.

Craftsman, Fabrication Specialist

Hopedale, MA
2009 - 2010

- Fabricated components used to build world-class trombones and trumpets. Built handslide parts utilizing free-hand lead soldering and brazing techniques, constructed slide subs, brazed inner sections for piston, rotary, trubore and axial-flow single, double and single valves for valve systems.
- Managed build process with regard to appropriate join material to use on which component. This maximised the future repair efficiency via the melting point of the join material.
- Fabricated slide components, straighten, balance and measure outer and inner slide tubes, use lathes to measure, cut and shape parts, deburr parts, buff bells and tubes on buffing wheels, and perform lathe maintenance.

Projects:

Personal Website - <http://katdobbins.com>

Developed a personal website using Django 1.9.2 and Python 3.5. It is deployed on Webfaction.

Boston, MA
2016 - Present

Jekyll Blog via Github Pages - http://katdob.github.io/blog_paperclip/

Made a music suggestions blog using Jekyll and Github Pages.

Boston, MA
2015 - 2016

Volunteering:

Geek Girls Carrots Workshop

I acted as a junior mentor for a blog building workshop at PyCon 2015. Using my previously built blog as an example, a mentor and I helped two participants through a tutorial provided by Django Girls.

Montreal, QB
April 2015

Django Girls Workshop

Attended a blog building workshop at Stack Overflow in New York City. The workshop was a 3 day event with interviews, lectures, and workshops. Mentors guided us through building & debugging processes of a blog tutorial created by Django Girls.

Manhattan, NY
March 2015
