| • Strategy & Planning | • Datacenter Management | • Multi-Site Team Management |

PROFESSIONAL EXPERIENCE

Winthrop Capital

Boston, MA

Head of IT / Senior Director of IT

January 2011 – Present

Head of Information Technology for Winthrop Capital and its affiliates; Winthrop Management and First Winthrop Corporation. I provide leadership, vision, planning and hands-on technical management for all infrastructure, enterprise applications, networking and technical support services.

- Champion and facilitate the business-focused partnership between IT and its internal/external stakeholders, working closely with business leaders to design and deliver technical solutions.
- Implement best practices for high-availability IT systems including governance, operating procedures, compliance and change management.
- Lead and manage IT teams including infrastructure, networking, enterprise application support, and third party consultants.
 - Provide management, guidance, training and personal development for IT team employees.
 - Identify and manage relationships with third party consultants and vendors.
- Provide development and support for IT initiatives: needs and cost analysis, budgeting, RFQ, vendor selection, contract negotiation, systems design and capacity planning.
- Project management, technical and hands-on leadership for IT team members and cross-functional employees.
- Manage a comprehensive IT security and compliance program; SDLC, change management and Sarbanes-Oxley compliance with annual external audits.

Major projects and accomplishments

- Implemented Yardi Voyager for Winthrop Management to facilitate our residential / multifamily portfolio.
 - Integration with Entrata for online leasing, website creation, integration with custom websites via API, resident portal, maintenance.
 - Integration with Rainmaker LRO, Rent Collect Global, Entrata, Rent Café, On-Site.
 - Upgrade from Voyager v6 to v7S.
- MRI 3.0 to MRI 4.5 upgrade
 - MRI web front end interface.
- Migration from Entrata to Yardi Rent Café.
- Creation of a comprehensive business continuity and disaster recovery plan.
 - Converted hot site disaster recovery datacenter to Microsoft Azure Site Recovery (Disaster Recovery as a service, DRaaS)
