Senior Lead .Net Developer / SOFTWARE ARCHITECT

Professional Summary

- Detail-Oriented Computer Engineer: - **BE Computer Engineering and Master of Science in Computer Science** enthusiastic having **15 years of Software development**. Areas of expertise include Web and Desktop Application Development, Programming Languages, Assembly Languages, Software Design Patterns, Data Structures, Design and Analysis of Algorithms, Software Engineering, System Analysis and Design, Database Design and Management, Operating Systems, Computer Architecture and Design, and Computer Networks.
- Accomplished, committed and creative **Lead Software Developer / Software Architect** with success of delivering IT Projects through improved productivity, performance, and cost control. Broad experience leading and innovating in both business sector and government sector with all levels of business interaction and management skills with global certification skills: - **Certified Agile Leadership, Certified Scrum Master, and Certified Scrum Product Owner**.
- Worked extensively on all the phases of software development life cycle including Requirement Gathering, System Analysis Design, Database Application Design, Framework Design and Coding, Unit Integration testing and Application Deployment on Waterfall and Agile Scrum.
- Coordinated with Project Director, Service Delivery Manager, Project Manager, Development Manager, Business Analyst, Developers, and Quality Analyst and worked closely with business team to understand the business specification.
- Designed, developed, and architected web-based application using HTML5, CSS3, Bootstrap, JAVASCRIPT, JQUERY, Angular 7/8, AJAX, KNOCKOUT JS, ASP.NET Web Forms, MVC4, MVC5, ASP. NET Core, C#.NET, Web API, ADO.NET, Entity Framework, Crystal Report, Web Services (SOAP & REST), WCF, JSON.NET, MSSQL Server 2012/2008/, Oracle 10g, 11C, PL/SQL, MY-SQL and Windows Azure.
- Strong knowledge on latest Microsoft technologies .Net Core 1.0/2.0/3.0, Microservices, Cloud native architecture and CI\CD.
- Strong knowledge on various programming languages C, C++, Core java, JDBC, Servlets and JSP, Hibernate, and PHP.
- Design, Develop, and Architect Applications on all layers of web and desktop platform. Developed Software from Small Scale to Large Enterprise Level Application. Extensively Worked on SOLID Principles, Various Design Patterns, Repository Pattern, DI, and Unit of Work for the Software Development. Worked on MVC, MVVM and MVP architectural style of Software Development.
- Extensively worked on database modeling, design, performance tuning, stored procedures, functions, collections, triggers, and database object in oracle 11g and 12c and MS SQL 2014/2010.
- Hands on experience working with source control software tortoise SVN, Team Foundation Server (TFS), IBM RTC, Azure Dev Ops and experience working on testing tools MS Unit Test, NUnit Test.
- Mentor other technical resources on the team, providing insights into the elements which influenced the recommended architectural approach. Created technical documentation, design, implement, and maintained high performance software solutions.
- Excellent communication and inter-personal skills, flexible and versatile to new environments, self-motivated a good team player and have worked in multicultural environment.
- Worked on various roles such as Software Architect, Team Lead, Senior Consultant, Project, and Development Lead with domain knowledge of higher education, health sector, finance, and business.

Academic Accomplishments

Certifications

MS Computer Science, 2012 University of The District of Columbia Washington DC BE Computer Engineering, 2009 Tribhuvan University Nepal	Certified Scrum Master - Scrum Alliance (Certificate ID: 000976684) Certified Product Owner - Scrum Alliance (Certificate ID: 000976684) Certified Agile Leadership -Scrum Alliance (Certificate ID: 000976684) Oracle SQL/ PLSQL -- Learning Tree International (Awarded with Distinction)
--	---

Technical Skills

Microsoft Technologies	Framework 4.5/4.0/3.5, WCF, Windows Service, SQL Server, SQL Server Integration Service (SSIS), SQL Server Reporting Services (SSRS), Windows Azure, Azure DevOps
Languages	C#, VB.Net, ADO.Net, T-SQL, PL/SQL, Visual Basic 6.0, C++, C, Java, PHP
Web Technology	ASP.Net, AJAX, JavaScript, WCF, SOA, Web Services, MVC, MVVM, MVP, AJAX toolkit, jQuery, JSON.NET, Knockout Js, Bootstrap, HTML, DHTML, CSS, XML, XSL, XSLT, Entity Framework
Windows Development	Win Forms
Web Servers	IIS 5.0, 5.1, 6.0 and 7.0, 7.5
Databases	SQL Server 2000/2005, 2008, 2010, 2012, 2014, Oracle 11g/12C, PL/SQL, Access, Teradata
Reporting Tools	Crystal Report 8/8.5,11.0, SSRS
Version Control	TFS, SVN, IBM RTC
IDE	2005/2008/2010/2012/2013/2015/2017
Operating Systems	Windows NT, 2000, XP, 2003, 2008,2010, Linux
Design, Architecture	MVVM, SOA, OOD, Design Patterns, Domain Driven Design (DDD), Factory pattern, Factory pattern, Development Enterprise Architecture, Distributed system,
Object Oriented Design	OOAD, SOLID, DRY, GRASP, KISS
Other Technologies	JSP, Servlets, Hibernate, Spring, JDBC

Professional Experience

Sr. Lead .Net Developer

State Of West Virginia - Higher Education Policy Commission

OCT 2015 - Present

- Lead a group of developers and work in collaboration with all the developers on the team.
- Estimate, plan and manage development tasks for several developers on projects, ensuring projects are delivered on time with quality. Worked closely with clients and end-users to establish problem specifications and system designs.
- Ensure Developers comply with established development standards and procedures.
- Guide to internal and external stakeholders in the development of solutions that create innovation.
- Provides feedback for development/engineering staff with respect to the project work
- Perform code reviews, developing and adhering to coding standards. Design, develop, UAT, and Deployment for a web site. Responsible for design and architect the applications, unit testing, build deployment, and mentoring other developer's work.
- Lead the four major projects Human Resources Report Card, Higher Education Facility Management System, Underwood - Smith, and Workforce.

- Worked on redesigning and development of legacy the application WV-Reauthorization and Heaps - Workforce from ASP.NET Web Forms to ASP.Net Core, Angular 9, HTML5, CSS3, and Windows Azure.
- Worked on C#.Net to migrate database calls from SQL server to Oracle 11g on Financial Aid Management System(FAMS) Application. Worked on SQL Loader to load bulk amount of state level Financial Aid Data.
- Lead a module of FAMS- Nursing, logging mechanisms. Designed , developed, tested, and deployed application to the production server Nursing application module from scratch, a subdivision of Financial Aid Management System (FAMS) Application.
- Created virtual directory, tested application on test server, and then deployed to the production server.
- Worked on HTML, CSS, JQuery, ASP.Net. Performed client-side validation through JavaScript Regex.
- Worked on the modification/additional features of the File Sub and Re-auth application. Created stored procedures that call to the Oracle database.
- Designed, developed, tested, and deployed responsive app “Underwood-Smith” using Bootstrap 3.0. A repository pattern was a design pattern used for the application.
- Created report using Report viewer of ASP.NET, used Dot Net high charts for state- level data portals. Implemented a Nlog for error logging mechanism on all the applications.

Environment: .Net Framework 3.5/4.0/4.5/4.6, C#, Web Service, JavaScript, Query, Angular 8, ASP.NET MVC4/5, HTML5, CSS3, Bootstrap 3, Oracle 11G/12C, PL/SQL, TFS, MS SQL, T -SQL, Oracle Developer, SQL PLUS, TOAD ,IIS, Windows Server R2 2008.

Sr. Net Consultant

Vastika INC, TX

Client: JP Morgan Chase Bank, Wells Fargo, and Kaiser Permanente.

JUL 2013 - SEP 2015

- Worked on project " ID-Certification" on JP Morgan Chase, Columbus, Ohio. This project Keeps tracks of employee information of different lob (line of Business).
- Designed and developed the front-end application using HTML5, CSS3, JavaScript, jQuery and ASP.NET MVC4 Technology.
- Developed a web application to display number of entitlement users, LOB, designed a new employee information system, display of employee using a web grid.
- Some of the client-side validations of pages were done also in jQuery. Used Google charts for client's side graph display.
- Use of ADO. Net to design and create the data access layer. Created stored procedures, functions, and packages. Oracle 11g used for database.
- Worked with the offshore developer in team-based environment, interacted with end users and resolved the bugs/issues based on the requirement of the application.
- Worked on different servers which include development, UAT, and QA. Used tortoise SVN for version control and source control. Performed unit testing using a visual studio unit testing framework.
- Worked on project "Client Dashboard System "on Wells Fargo, St Louis, MO.
- Design of the web pages and page navigation and identify web controls that best fits for UI requirements.
- Designed and developed the front-end application using HTML, CSS, knock out JS and Web API controller Technology.
- Used third party tools CK-editor for rich text controls and for actionable emails and actionable URLs.
- Worked on n-tier architecture, WEB API on the server side, and used a repository pattern for data abstraction.
- Worked on cross browser compatibility issue, IE 8 is the major browser tested throughout the application.
- Developed a Web application to display household users, FORM section, designed a system that displays data from controller to view model and, display the information on the view page using HTML, CSS, and JavaScript
- Used team foundation server (TFS) for version control and source control. Performed unit testing using a visual studio unit testing framework.
- Worked on "Equipment management system" on Kaiser Permanente, Denver, CO.

Environment: .Net Framework 4.0, C#, Web Services, JavaScript, jQuery, ASP.NET MVC, HTML, CSS, SQL Server 2012, Tortoise SVN., TFS, IBM RTC, Oracle 11g, AJAX.

Consulting Projects

Pinnacle Business Network Inc, Washington DC
Bench Code Solutions (offshore)

NOV 2012 - APR 2013

- Developed the web application using HTML, CSS, JavaScript, jQuery, Php, and backend using MY-SQL as the backend database.
- Resigning of the Client Web Portal. Worked on graphics Designing tools Photoshop and Illustrator.
- Testing of websites on different browsers IE8, Firefox, and Google Chrome.
- Developed and implemented user interfaces based on W3C standards.
- Developed client-side validation code using JavaScript and JQUERY.
- Extensively used JQUERY to perform AJAX calls for creating interactive web pages on JSON response.
- Designed applications that execute on various browsers such as Internet Explorer, Mozilla Firefox, and Google Chrome using various debugging tools like Firebugs/Chrome Developer Tools.
- Created new application using ASP.Net with C# and SQL server databases. Used CSS (Cascading Style Sheets) in ASP.Net pages. Used client-side validation to forms using Java Script.
- Provide Support to the teams to fetch the data from the centralized database using ASP.net XML Web Services.
- Used Team Foundation Server (TFS) for project repository and versioning control.
- Prepared high level and low-level system design UML diagrams (class diagrams, sequence diagrams).

Environment: Visual Studio 2010, .Net Framework 3.5, ASP.Net, C#, Ajax, Web Services, SOA, XML, Java Script, SQL Server 2008 and TFS.

Application Developer /Graduate Assistant
University of The District of Columbia - DC Government
Washington D.C

MAR 2011 - OCT 2012

- Involved in collecting and analyzing the business requirements from the client for RIMI (Research Infrastructure in Minority Institutions) Project funded by the National Institutes of Health (NIH).
- Worked on UDC PATHS Project funded by DC Department of Human Services.
- Responsible for designing and developing the front-end interface using HTML, CSS, JavaScript, jQuery, and ASP.NET.
- Used master page for consistent design, state management technique for storing and transfer data from one page to other page throughout the application.
- Extensive use of grid view for data display on the UI Page. Implemented FORM-based authentication and security.
- Developed a web application portal to display customer information, check status, made a new registration information system.
- Created relationships on the tables, wrote complex stored procedures, functions, triggers, and cursors for data retrieval. MS- SQL was the technology used.
- Implemented asp.net AJAX to perform partial refreshing of the UI Page.
- Heavily tested UI page for cross browser compatibility issue, IE 8 is the major browser tested throughout the application.
- Participated in a daily status meeting, weekly meeting, daily status meeting. Strong reporting and effective communication with project manager, business teams, QA, and other developers.
- Responsible for entering the timesheet of the customers and sent them to the DC government for approval.
- Maintenance of the hardware devices such as printer, fax within the organization, maintained the servers and configure hardware in accordance with standards and project/operational requirements.
- Created virtual directory, setting up IIS application pools and deployed web application on the web server.
- Perform hardware upgrades and resource optimization as required.

Environment: HTML, CSS, JavaScript, jQuery, Visual Studio 2010, Photoshop, Dreamweaver, MS ACCESS, IIS, SQL Server 2008.

Dot Net Developer
Crossover Nepal
Kathmandu, Nepal

JAN 2006 - NOV 2009

- Designed and developed user interfaces using Win forms for Desktop application.
- Designed and developed web pages using ASP.Net.
- Support and troubleshoot the existing webform-based system using C#/ASP.Net, VS 2003, SQL Server 2000.
- Implemented AJAX for improvement in performance.
- Used ADO.Net for database connectivity, storage, and retrieval on SQL Server.
- Used datasets and ADO.Net to retrieve data from the database.
- Extensive use of validation controls, state management technique, grid view controls, and Forms based Authentication in asp.net.
- Client-side validation done with JavaScript. Used HTML, CSS for designing of the front-end interface.
- Used Crystal Reports for report viewer.
- Implemented email functionality using smtp protocols in asp.net.
- Used File upload control, checked the file type and file size in server side. Used hidden field in asp.net.
- Extensive use of grid view controls in sorting, searching, paging, updating, and deleting features.
- Extensively used master page for consistent layout. Implemented md5 and SHA256 encryption for login validation on server side.
- Loaded and stored image from database to asp.net and vice versa.
- Created tables, Stored Procedures and functions in SQL Server 2005 and reports using SQL Reporting Services.
- Worked on setting of IIS.

Environment: HTML, CSS, JavaScript, Visual Studio 2003, SQL Server 2000, .Net Framework 3.0.

Internship/ Academic Project

MSCS, University of the District of Columbia

SEP 2010 - DEC 2012

1. "A Spatiotemporal uncertainty model of degree 1.5 for continuously changing data objects."

This project was implemented based on the research paper written by the Chairman and Professor of CSIT UDC, Dr Byungy Yu. It was carried out by a team of three members under his supervision. It calculates the uncertainty model for continuously changing data objects.

- Worked on google maps api for displaying of continuous changing objects.
- Worked on JavaScript for displaying oval and elliptical path, Java was the server-side programming language used.
- Implemented position, tracking and location of object using android phone, wrote programming on Java.
- Created stored procedures, functions, and triggers. Worked on Java with JDBC to display data on the front end. Oracle was the database used to store data for continuously changing data objects with frequent timings.

2. " Developing a multi-touch electronic advisor in the hallway of the Department to enhance student service at the University."

This project was carried out by group of three members. Microsoft surface SDK was used. C# and MS-SQL were the programming language used. This was the project related to the course software engineering and design, several aspects of UML were carried out before working on developing the application.

BE Computer Engineering, Tribhuvan University

Major Project: "online Banking System of Credit Union."

DEC 2005

This project was carried out by a group of three members for six months as a part of curriculum - academic internship to fulfill the degree requirement.

- Travelled to the client physical location, collected business requirements, implemented software design and engineering and coding and testing. Finally, deployed the application to the live environment.
- Created new user interface after the submission of required documents from the customer. ASP.NET, C#.Net, and MS-SQL was the technology used.
- Confirmation of email sent after 24 hours of opening the account.
- Designed and developed the interface Deposit and withdrawal, and generated report using report viewer.
- Provided mortgage, auto loans after the verification of income. ASP.Net validation controls, State management technique and Form based authentication were used. Created table, implemented constraint, stored procedures, and functions on the backend.

Minor Project: “KEC Library Management System.”

DEC 2004

Minor Project: “Expenses Tracking System.”

These projects were carried out as a part of academic curriculum to fulfill the degree requirement.

- Extensively used asp.net server control validations, state management techniques, Form based Authentication, and Grid view controls.
- Implement asp.net ajax controls for partial refreshing of the asp.net page.
- Worked on vb.net and ado.net for database connection to MS SQL.
- Created Stored procedures and functions on the backend.
- Worked on three tier architecture.
- Designed and developed the front-end interface with HTML, CSS.
- Client-side validation was done by JavaScript.
- Worked on VB6, used Crystal Reports for report viewer.

Environment: HTML, CSS, JavaScript, VB6, Visual Studio 2003, SQL Server 2000, .Net Framework 3.0

Workshop, Conference, and Presentation

“Human Resource Report Card, West Virginia” Application Overview presented at Conference Stone Wall Resort, Roanoke, WV, September 2019 “Annual Review meeting of board of Director Human Resource” Higher Education.

“File Submissions, West Virginia” Application Enhancement presented at Conference Stone Wall Resort, Roanoke, WV, June 2018 “Annual Review meeting of four-year public institutions” Higher Education.

Trainings

Certified Scrum Master - Knowledge Hut Solutions Inc
 Certified Product Owner - LitheSpeed, LLC
 ITIL Foundation, Prince2 -- Skill Logics Inc
 Administering the Web Server (IIS) Roles of Windows Server (10972)- Learning Tree International
 Developing ASP.NET Core MVC web Applications (20486)- Learning Tree International
 Oracle Database 12C Introduction, PL/SQL Programming - Learning Tree International
 Learn HTML 5: Platform-Independent Web Development with CSS3 and JavaScript - Learning Tree International
 Window Azure Suite, DevOps - Deccan soft Inc
 Professional Certificate in IT Project Management - University of Washington/ Pearson advance
