Objective: Seeking QC Manager, Supervisor, Auditor, Principal QC Specialist position in Quality department or related field.

Note: Permanent and full time position only

Summary:

- Over two decades of hands-on QC Chemistry Laboratory and some QA experience and details oriented, results driven. Thrive in fast pace QC Chemistry environment, CRO, CLO & CMO, multidisciplinary environments.
- Strong Auditing experience vs ISO9001 and support Continual Improvement initiatives, programs, and project management.
- Proficient in testing Biopharmaceuticals: Finished Products, in-process and stability samples using: HPLC (SEC, WCX, POROS, RP, Empower, Chemstation, Vanquish & Shimadzu Class-VP), UV-A280, TLC, FTIR, NIR, TOC, NMR, Dissolution, Viscometer, GC, Karl Fischer and SDS-PAGE for biologics and non-biologics. Proficient doing quarterly maintenance and testing Atomic Absorption Spectrometer (AA) samples for sodium and zinc. Analyzed Raw Materials, API, tablets, capsules, liquids, creams, ointments/Topicals, sustained release preparations, suppositories, vaccines, nasals and inhalers.
- Expert in final reviewing finished products and stability for CoA.
- Lab Auditing experience to make sure compliance with GMP/GXP/GDP/Data Integrity and 21 CFR Part 11 with FDA regulations and with other agencies. Brought great ideas to prevent observation and reduce number of deviations/Investigations.
- Critical technical skills, accurate, organized recording, lab safety, regulatory compliance, process improvement, and service delivery for increased efficiency.
- Talented at multi-tasking, verbal and written communicating across departments and executing routine and critical lab operations included but not limited to Chromatography.
- Worked collaboratively under pressure to resolve process related issues, enter data promptly, and perform cleaning and standardization of lab equipment so goals are achieved.
- Using electronic systems: Labvantage/Citrix (LIMS), Veeva and BlueMountain to review QC personnel lab work.
- Expert in training, coaching/mentoring new analysts on new methods. Also, collaborate with functional leads to ensure effective communication to resolve issues.
- Expert in training, coaching/mentoring new analysts on new methods. Also, collaborate with functional leads to ensure effective communication to resolve issues.
- Biotechnology and Pharmaceuticals international experience
- Experience with Plateau, NuGenesis, ISOtrain, with knowledge of API & ASTM, MSDS, OSHA, 5S & LEAN Sigma.
- Familiar with investigation, deviation, CAPA, OOS, OOT, and LE.
- EH&S experience and usage of PPE

Experience and Achievements:

**Eurofins, MA QC Chemistry & QA, (Held positions from supervisor/Specialist to Senior/Lead Chemist)
Mar2017- Oct2021**

- Familiar with **Deviations/Investigation/Trackwise/Veeva, CAPA, OOS, OOT, and LE**. Also reviewed Data Packages generated by different levels of analysts, Validation Protocols, Batch Records Review, column steps and peer review for accuracy and compliance.
- **Auditing QC experience to prepare for FDA, TGA, Health Canada and EMA Auditing/inspection.**
- **Also done QC audit to make sure compliance with GMP/GXP/GDP/Data Integrity as per FDA regulations.**
- Highly organized on multiple levels on daily activities and within the group.
- Able to communicate efficiently, internally and externally to get the job done to final stage on time.
- Experience dealing with in-house products and contract manufacturing products with different clients.
- Created stability program for new samples to be labeled and placed in incubators and freezers.
- Done auditing responsibilities by reviewing lab logbooks, weekly check list, lab instruments performance, calibration and preventive maintenance logs and reports. Also auditing analysts while they are working in the lab.
- Prepared the lab for pre-inspection/Audit by doing mock interview to get the team familiar with the auditing process without surprises.

- Revising QC SOP's documentation in accordance with current GMP and Data Integrity ALCOA+.
- Expert in final reviewing finished products and stability for CoA.
- Subject matter Expert: Atomic Absorption/PM, HPLC and TOC.

Sanofi, MA

Oct-2012 – Dec-2016

Sr. QC Analytical Chemist

- Auditing preparation experience for FDA, Canadian and EMEA inspection.
- Proficient in testing Biopharmaceuticals: Finished Products, in-process and stability samples using: HPLC (Empower), UV spectrophotometer for PNP, Bradford & A280. Proficient using and testing Atomic Absorption Spectrometer (AA) samples for sodium and zinc.
- Perform QC data packages review and approval of documents before product release.
- Tracking and trending of generated QC data to make sure analysis results within specification.
- Run Validation protocols on different analysis.
- Ability to analyze a problem/situation and recommend solutions.

Independent Consulting, MA (Held few positions within Quality Dept.)

2010 - 2012

QC Chemistry

- Independent consultant for various confidential clients within QC & R&D departments.
- Testing samples, reviewing data packages, verifying test results in GMP & Non GMP environment. Also troubleshooting methods and HPLCs and other lab instruments.

Genzyme Corp., MA

2010 - 2010

QC Analytical Chemist

- Tested samples using HPLC Chemstation/Empower, POROS/Concentration, SEC/Aggregation, etc. analysis for in-process stability and finished products, etc. for lyophilized/Injectables and biological products.
- Extensive experience reviewing data packets generated from different analysts.

Abbott Bioresearch Center, MA

2002- 2009

QC Research Associate

- Worked on afternoon shift on my own for seven years with zero incident/accident.
- **Analyzed samples using HPLC (SEC, WCX, POROS, RP), UV A280, TOC and SDS-PAGE for biologics.**
- Lab auditing experience and HS&E inspection. Also Revised SOPs to reduce LEs. Also done Lab Audit to make sure compliance with GMP/GXP/GDP/Data Integrity as per FDA regulations.

Johnson Matthey Co., MA

2001- 2002

Analytical Chemist

- Solid knowledge and work experience of HPLC, GC, NMR, KF and FTIR as per GMP, WHMIS, FDA and SH&E.

GlaxoSmithKline (gsk) Ontario, Canada

1998- 2001

Analytical Chemist

Performed HPLC, GC, Dissolution, UV, FTIR, NIR, and TLC for tablets, capsules, liquids, creams, ointments, Topicals, suppositories, nasals, inhalers, vaccines and Raw Materials. Also done Lab Audit to make sure compliance with GMP/GXP/GDP/Data Integrity as per FDA regulations.

Education & Skills:

Toronto University Evaluation-D.U. Faculty of Science (Possess USA Equivalency)
Bachelor of Science Degree (Four Years) Applied Chemistry.

Chemistry Lab Courses: HPLC, LC-MS, GC and Lab. Assay Methods.

Computer courses: CBS, Toronto, ON.

Courses & Seminars:

1- Internal Auditor Certificate ISO-9001: 2015 (360 Training)

Sep-2021

2- Auditing Techniques for Clinical Research Professionals (Barnett International)

Oct-2019

- 3- Drug Safety and Pharmacovigilance, cGMP: Good Manufacturing Practice & GCP: ICH Good Clinical Practice(ICH-GCP) Jul-2020
- 4- Project Management, Time Management skills, LC-MS Techniques, Interpretations & Instrumentation, Method & Instrument Validation, Ion Chromatography and few **HPLC courses**. GSK Short courses: EH&S, WHMIS, Network Exchange, Multichrom, Lean Sigma, Words L-2, Method & Instrument Validation (PSG), CVG seminars& GMP.

Honors and Awards:

- Received a Certificate Award for completing successfully five years contributing to success of launching active ingredient, working in QC Labs as Research Associate.

Memberships: Member of American Society for Quality
