## WORK EXPERIENCE

WELLINGTON MANAGEMENT COMPANY, Boston, MA ([www.wellington.com](http://www.wellington.com))

6/2016 – 6/2023

### **Vice President, Director of Software Product Management and IT Manager, Client Platform Technology (6/2020 – 6/2023)**

- Managed multiple product teams to build Salesforce-based workflows, Client Experience product, Reference data products, and Internal data analytics-oriented products serving ~100 business users. A key product director role to build partnerships with ~30-40 cross-functional stakeholders (incl. COO, CIOs), and oversee program management responsibility for eight product workstreams with Agile development and release management.
- Led Coaching, Performance reviews, and Compensation outcomes for approximately 5 full-time product managers in the team, and led appropriate reviews for ~20 consulting partner members in a matrixed organizational structure. Part of a recruiting team to help assist in full-time recruiting, and continuous growth learning initiatives.
- Led multi-year cross-functional programs for fund and product management strategic digital transformation by executing business process re-engineering, technical roadmaps, quarterly product roadmap plannings, resource allocations, and technology solutioning / outsourcing decisions. Overall responsibility for ~4M\$ budget management.
- Led the overall Product vision and strategy for all eight products, and led overall C-level communications. Achieved a team of teams' growth of ~200% in last three years, and received exceptional reviews from various counterparts.

### **Lead Systems Analyst, Wellington Funds Group Technology (6/2016 – 6/2020)**

- Led ~7-10 different business process outsourcing initiatives via active engagement with third-party vendors for licensing and contracting, and technology solutioning and implementations (key fund management functions included fund launch workflows, fund risk, compliance, prospectus and factsheet automation, data analytics, board reporting, marketing, etc.)
- Acted as a key business analyst to design and develop Wellington's Salesforce-based fund reference data product (serving around 30 data consumers and 400 users) and Salesforce-based external client-facing digital onboarding product for fund investor onboardings (serving around 500 clients per year) from institutional, alternatives, and private equity areas.

- Demonstrated a strong regulatory background in various areas of Fund Compliance, Risk & Governance, with technology solutioning buildout of 4 products around key regulatory needs (ERISA, CFTC, IPO, Security Lending, GDPR, MIFID & FormPF).
- Led the business requirements and analytical design for developing a key ETL-based product for data process mappings and data sourcing - Migrated around 100 Fund data file feeds to a strategic data processing framework with the collaboration of around 15 vendors (Fund Administrators, Transfer Agents, Fund Analytics Providers & Fund Distributors).

GOLDMAN SACHS & CO., New York, NY & Greenwich, CT ([www.goldmansachs.com](http://www.goldmansachs.com))

10/2006 – 6/2016

**Analyst and Senior Software Engineer, Vice President, Asset Management Technology (4/2011 – 6/2016)**

- Worked for GS hedge fund to design and develop full stack end-to-end electronic trading and automated booking products for listed equities. Developed a product that uses FIX protocol to trade with various external vendor platforms (Bloomberg and Tradeweb) and perform end-to-end automation of daily trading, and post-trading recons for ~50% trade volumes.
- Led the design and implementation of a new generation technology stack using HTML5, JS, RESTful services, and MongoDB to automate the infrastructure for daily position reconciliation and NAV sourcing for automated T+1 order generations. Coached two software engineers for new development skills and SDLC.
- Managed a team of two individuals on the Goldman Sachs Investment Management and Merchant Banking areas for developing systems for FX and equities trade bookings and YTD performance metrics.
- Led the analysis and development of regulatory systems for complying with Dodd-Frank regulation for US credit and MIFID regulation for EU business. Key developer for cleared derivatives systems development (CDX, IRS, and TRS).

**Senior Software Engineer, Vice President, Equities Risk Management Technology (10/2006- 4/2011)**

- Managed a team of three individuals on the Goldman Sachs equities trading floor focusing on developing real-time position and risk management products for the GS equity business.
- Developed a global risk management product infrastructure and eventually deployed this low-latency, RV-based risk management product across all global listed and derivatives businesses as a core architect/system analyst. Asset scope included single stocks, program baskets, international equities, FX, ETFs, listed options and futures, and Swaps.
- Managed a product that served about 150 users across more than 13 global GS equity business units with about 450K daily positions, and managed about \$5B per side of daily exposure across global floors.
- Performed various project management responsibilities to manage risk management projects for senior equity partners, and managed team resources effectively for on-time delivery. Received excellent peer reviews.
- Designed framework for real-time, fast-calculated ETF pricing product. Also developed a framework for trader's performance metrics, value at risk (VaR), and YTD P&L management tools used for compensation metrics.

HAUPTMAN-WOODWARD MEDICAL RESEARCH INSTITUTE, Buffalo, NY ([www.hwi.buffalo.edu](http://www.hwi.buffalo.edu))

2/2004 – 9/2006

**Software Engineer, Grid Computing**

- Developed a Grid portal which allowed users to submit computational jobs over distributed computing Grid of about 5K processors across Western NY. A diverse set of scientific applications ported on the web portal helped the scientists to use the Grid efficiently and get faster throughput for research processes.
- Worked with various scientists to port around 12 applications on the Grid. A major achievement was porting Shake-n-Bake (one of the 20th century's top 10 algorithms) on the IBM Blue Gene – L (world's fastest supercomputer) (11/2004).

**E D U C A T I O N**

**Master of Science**, Computer Science, STATE UNIVERSITY OF NEW YORK, Buffalo, New York

- GPA: 3.78/4.00

**Bachelor of Engineering**, Information Technology, NIRMA INSTITUTE OF TECHNOLOGY, Ahmedabad, India

- GPA: 3.85/4.00
