

Isobelle Lim

(806) 654 - 4492 | bellelim@gmail.com | Boston, MA & New York City, NY | bellelim.com

EDUCATION

Northeastern University | Boston, MA

Sep 2019 – May 2024

Bachelor of Science in Computer Science, Human-Centered Computing

Activities: Alpha Phi Omega (Pledge Chair), Code4Community (Product Manager), Global Journal (Web Chair)

Coursework: Object Oriented Design; Algorithms and Data Structures; Design Process Context & Systems;

Information Presentation & Visualization; Human Computer Interaction; Database Design; Web Development

TECHNICAL SKILLS

Languages: Swift, Objective-C, JavaScript, TypeScript, Java MongoDB, HTML, CSS, Python, C++, MATLAB, SQL

Tools: XCode, Git, IntelliJ, VS Code, Figma, AdobeXD, Postman, Tableau, Jira, Confluence, Trello

EXPERIENCE

Ginger Labs | Product Management & Software Engineer Co-op (iOS)

Jun – Dec 2023

- Led research, planning, and development on Zoom Tool improvements - a power feature for 1M+ users – and drove both long-term user requests, bug fixes, and new designs to completion, showcased in 14.3.2 release
- Added search feedback features leveraging Redux to optimize performance for stress-tested large libraries
- Polished product via various Crashlytics fixes, Redux rearchitecting, SwiftUI rewrites, and performance fixes
- Wrote, researched, and polished designs on end-to-end product pitch for Outlines, to be developed in 2024

Ginger Labs | Software Engineer Co-op (iOS)

Jul – Dec 2022

- Maintained and developed multiplatform note-taking app, Notability, for millions of monthly active users
- Refactored model and ensured backward compatibility for a new paper feature via debug tools and analytics
- Converted and reviewed 5000+ lines of Objective-C to Swift and UIKit to SwiftUI converted code
- Integrated CoreML into app for smarter sticker behavior during company hackathon

Wellframe | Software Engineer Co-op (iOS)

Jul 2021 – May 2022

- Rewrote 2 APIs increasing their modularity and developed a new UI component integrating HealthKit data
- Led partial app redesign epic with new high-value, dynamic UI features including improved user sign up flow, standardization of existing alerts, and new progress animations utilizing Auto Layout and Storyboards
- Integrated custom Siri Intents in company hackathon, winning “Most Out of the Box” out of 12 teams

PROJECTS

Note Switcher (Notability)

- Refined new unfinished feature with 10M+ events per month following app-wide redesign launch
- Introduced a mini-library into the note view with analytics-informed product direction and Redux design
- Led large-scale refactor to optimize performance and overall increased associated sentiment from 1.9 to 3.6

“Wordle Wonders” Visualization Tool

- Led team of three as project managing developer to build visualization tool for a dataset, utilizing D3.js
- Directed effort through initial design, testing, user interviews, reiterations over three-month period
- Designed and developed dynamically linked histogram and pie chart modeling Wordle performance data

“Save Motunui” Sustainability Exhibit

- Led team of four to build interactive exhibit for Boston Museum of Science educating on biodiversity
- Directed team as project manager during prototyping, proof of concept, and testing over four-month period
- Designed UI/UX game flow with user testing and universal design principles across physical and digital parts

INTERESTS

Design, Cooking, Plants/Gardening, Indoor Bouldering, Escape Rooms, Orchestral Music, and Trivia
