

SUHAIL ASIF KAZI

suhailkazi93@gmail.com | +1 (617) 946-6265 | <https://www.linkedin.com/in/suhail-kazi/>

Dynamic Industrial Engineer with 5+ years of a strong background in project management, process improvement, site layout optimization, logistics, and lean manufacturing strategies. Skilled in problem solving, using Excel VBA, AutoCAD & advanced tools like Tableau, SQL to streamline operations, reduce operational costs & improve production efficiency. Six Sigma Green Belt certified, Supply Chain Management, with hands-on experience in inventory management and time-motion studies.

EDUCATION

Northeastern University | Boston, MA

Aug 2024

Master of Science in Industrial Engineering

University of Mumbai | Mumbai, India

May 2016

Bachelor of Engineering in Mechanical Engineering

SKILLS & CERTIFICATION:

Analytics Tools: SQL, Tableau, Excel, Visio, VBA, Tableau, PowerPoint, Time Motion study, PFMEA, Lucid chart

Supply Chain: Demand Forecasting, Inventory Management, Supply Chain Management, Warehouse Management System(WMS)

Lean & Design Tools: JIT, Kaizen, 5S, Kanban, Continuous Process Improvement, Value Stream Mapping, Takt time, PFMEA, 8D, A3 Process, RCA, Statistical Process Control, Gemba, DMAIC, MODAPTS, MOST, Poka-Yoke, AutoCAD, SolidWorks, Line balancing

Certifications: IISE Six Sigma Green Belt, Supply Chain Engineering Management Graduate Certificate

PROFESSIONAL EXPERIENCE:

Industrial Engineering Intern, Commonwealth Fusion Systems, Devens, MA

Sept 2023 - Dec 2023

- Developed and Implemented **RPA** using **Excel VBA scripting** to automate repetitive tasks, improving productivity.
- Streamlined PF Bay achieving **10% space optimization** to integrate Copper Cap Workstation for optimal throughput successfully.
- Authored comprehensive **Work instructions (SOPs)**, documentation & led training to ensure **quality & operational proficiency**.
- Implemented visual factory elements of safety hazard ensuring compliance with safety protocols and PPE requirements.
- Re-designed crate and enhanced scheduling to eliminate bottlenecks and streamline copper plate transportation, ensuring timely and cost-effective vendor deliveries and seamless manufacturing operations.
- Lead 5S audits & red-tag area initiative reducing waste & improve workplace area driving a culture of **continuous improvement**.
- Managed **Kanban project** to streamline inventory levels, facilitate material flow & reduce overstocking and material shortages.

Industrial Engineer, Sarvotech Industries Pvt Ltd, India

Dec 2019 - Aug 2022

- Extracted & analyzed ERP (SAP) datasets using **SQL**, driving data-driven strategies to optimize resource utilization & reduce costs.
- Supported procurement team in **evaluating RFQs**, negotiating optimal terms with suppliers to meet budgetary & financial target.
- Communicated operational expectations to suppliers while acting as technical link between procurement and supply chain to develop and validate specifications.
- Optimized warehouse layout and process workflow through **data visualizations**, enhancing storage allocation, order fulfillment speed and minimizing material handling inefficiencies.
- Lead DMAIC project achieving **60% damage reduction** by root cause analysis, process capability metrics & lean methodologies.
- Optimized material flow and inventory management systems by evaluating production needs, lead time variability and inventory turnover rates.
- Implemented labor standards derived from time-motion studies (Workstudy +), improving warehouse efficiency and productivity.
- Implemented new slotting processes through regular **SKU profile evaluations**, achieving **16% gain** in picking efficiency, a **20% increase in UPMH** and cost reductions through demand-driven product placement.
- Contributed to cross-functional **VSM** events, to eliminate bottlenecks, reduce process waste and drive cost-saving improvements.
- Developed a KPI-driven dashboard for real-time monitoring of warehouse activities, improving visibility & operational control.

Manufacturing Engineer, Sarvotech Industries Pvt Ltd, India

Dec 2016 - Nov 2019

- Collaborated with clients and developed tailored kitchen equipment designs and layouts in **AutoCAD** to align with customer needs and maximize workspace efficiency.
- Coordinated **MRP-driven** production scheduling & managed Bill of Materials (BOM) updates optimizing lead times.
- Hands on exposure to full-cycle project planning from configuration design to actual manufacturing & assembly.
- Implemented statistical process control (**SPC**) to monitor material usage, reducing variance and achieving a **12% scrap reduction**.

ACADEMIC PROJECTS:

Manufacturing Facility Planning. (Excel, Visio)

Aug 2023

- Directed the planning and execution of a drone manufacturing facility, ensuring project timelines, budget and goals were met.
- Utilized principles & tools like **Work Breakdown Structure, PERT analysis, Risk Analysis, Resource allocation & Gantt chart**.
- Reduced adverse event likelihood by 30% and project duration by 15% through **Risk Assessment Matrix** and efficient planning.

Lean Optimization for Meal Packaging. (Lean Principles, Visio, PowerPoint, Word)

May 2023

- Implemented Lean principles, including 5S methodology and standardized workflows, to streamline food packaging operations, reducing process time by 30% and increasing efficiency by 25%.
- Optimized resource allocation & volunteer coordination using flow diagrams & role assignments, minimizing bottlenecks and improving accuracy by 50% in diet-specific meal packing.
