SUMMARY

Senior Software Engineer with 10+ years of experience building scalable web applications. Skilled in React, Next.js, TypeScript, Node.js, and GraphQL, with expertise in design systems, reusable component libraries, and data visualization. Experienced in front-end architecture, performance optimization, and full-stack development, delivering products from concept to scale.

SKILLS

- **Web Technologies:** React, Next.js, TypeScript, JavaScript, Node.js, Express.js, GraphQL, RxJS, Zustand, Redux, D3.js, Backbone.js, jQuery, Handlebars.js, SCSS, SASS, GSAP, Bootstrap, Material UI, Tailwind, Styled Components, Storybook
- **Testing & Analytics:** Jest, Jasmine, Mocha, Chai, Sinon, Adobe Analytics, Google Analytics, Tealium
- **Databases & Back End:** MongoDB, MySQL, Oracle, Prisma, Nest.js, REST API Design, Redis
- **Dev Tools & Platforms:** Git, Nx, Lerna, Webpack, Vite, Gulp, Grunt, Docker, Grafana, ESLint, Prettier, Babel, Yarn, Vercel, Heroku, AWS, Azure, Figma
- **Practices:** CI/CD, Agile, Accessibility, Performance Optimization, A/B Testing, Server-Side Rendering (SSR), Responsive Design, Internationalization, Web Security

WORK EXPERIENCE

RADIAN, Remote

07/2022 – 08/2025

Senior Software Engineer

Joined as an early engineer at startup Homegenius and took initiative in shaping front-end architecture, delivering core product features, and leading performance optimization for a greenfield real estate platform.

- Built high-performance features using React, Next.js, TypeScript, RxJS, and GraphQL, enabling real-time property search.
- Architected and maintained an Nx-based monorepo, enabling shared libraries and consistent tooling across projects.
- Developed 50%+ of reusable UI component library (Styled Components) for consistent design and faster delivery.
- Implemented SSR and performance optimizations, reducing load times to <5s across key pages.
- Integrated Google Maps API for property visualization, improving customer engagement.
- Built REST APIs with Redis caching, improving search response times by 40%.
- Developed backend services using Nest.js, Prisma, and MongoDB.
- Implemented Azure AD authentication and managed complex state logic with Context API and Zustand.
- Leveraged AI developer tools (e.g., GitHub Copilot) to improve productivity.
- Created SendGrid email templates for system alerts and communication.
- Added feature flags and A/B testing via LaunchDarkly, improving engagement and safe rollouts.

BANK OF AMERICA, Plano, TX

10/2021 – 06/2022

Assistant Vice President (AVP), Software Engineer II

Owned the design and implementation of a reusable component library to standardize UI across enterprise apps with a focus on accessibility and testability.

- Delivered components compliant with WCAG Level AA accessibility standards, improving usability for all users.
- Documented and showcased components in Storybook, streamlining developer onboarding and adoption.
- Authored unit tests with Jest to ensure component quality and reliability.
- Collaborated across teams to align development with business and agile goals.

TAPESTRY, INC., Remote

02/2021 – 09/2021

Web Developer (Contract)

Drove performance engineering initiatives to improve web vitals and built dashboards to visualize and act on performance data.

- Developed Splunk Rigor scripts to track web performance and Core Web Vitals.
- Improved page load time by 25% by optimizing Largest Contentful Paint through image compression, lazy loading, and prefetching.
- Built responsive dashboard using React.js, Next.js, and Recoil for performance metrics visualization.
- Created serverless functions to handle back-end tasks, improving scalability and response times.
- Collaborated with cross-functional teams to implement data-driven optimizations.
- Conducted regular performance audits to ensure site efficiency and reliability.

STATE STREET, Boston, MA

10/2019 – 01/2021

Web Developer (Contract)

Developed real-time risk monitoring tools and custom data visualizations to support financial operations and SLA tracking.

- Built real-time risk monitoring applications using React, TypeScript, and Webpack to visualize financial data.
- Designed custom data visualizations with D3.js and Canvas API for fund volumes, SLA tracking, and incident analysis.
- Created applications providing insights on performance, risk, incidents, and SLA metrics for issue management.

FANNIE MAE, Herndon, VA

03/2019 – 09/2019

Web Application Developer (Contract)

Customized SharePoint sites and integrated analytics tools to track user behavior and deliver product usage insights.

- Developed SharePoint customizations using .NET, Visual Studio, JavaScript, and jQuery.
- Integrated Google Analytics and Tag Manager to track usage and deliver insights.
- Built reusable modules to capture and report session data, enabling consistent analytics across applications.
- Created dashboards and reports with Power BI to provide clear visibility into key metrics.

MACYS.COM, San Francisco, CA

02/2017 – 02/2019

Web Developer

Engineered tracking infrastructure with Tealium and built responsive features for customer-facing applications across Macy's and Bloomingdale's.

- Built responsive customer-facing product features for Macy's and Bloomingdale's platforms.
- Developed Tealium-based tracking infrastructure, improving data loading efficiency by 30%.
- Analyzed and migrated tag elements across business segments.
- Built reusable functions for session tracking, enabling teams to quickly implement analytics on new pages and sections.
- Worked with CI/CD tools like Jenkins and Docker to streamline the deployment process and ensure high availability.

CITRIX GOTO, San Francisco, CA

04/2015 – 01/2017

Front-end Developer

Built core UI components for GoToMeeting's real-time platform, including video, voice, feedback features, and internationalized support.

- Developed a single page application (SPA) for GoToMeeting using WebRTC for real-time video, voice, and PSTN services. (app.goto.com/meeting)
- Developed core UI components, chat notifications, and role-based controls with internationalization support.
- Implemented feedback surveys, help screens, and onboarding flows to improve user experience.
- Ensured cross-browser compatibility across Firefox and IE 10–11, including support for GoToMeeting Chromebox kiosk app.
- Built analytics modules with Google Analytics and Kibana to monitor performance and usage.

EDUCATION

San Jose State University

Master of Science (M.S.), Software Engineering

Anna University

Bachelor of Engineering(B.E.), Computer Engineering
