ADDITIONAL INFORMATION

Professional Qualifications: Completed and received a certificate for Bloomberg's BMC course.

IT Skills: Experience working with Excel, Python, and EViews for creating financial models.

Languages: English – native

Achievements and Interests: I have a strong passion for investment theory, cars, and poker.

- In my free time I create financial models - DCF - using Python and Excel. I use these models to analyse securities and build portfolios then act accordingly using a trading account.
- I try to attend every car show I can in the UK. I conduct maintenance on my own car. I'm also interested in the engineering behind turbos and how to make them more efficient in delivering power quicker to the engine (example "Hot V" configuration).
- I enjoy playing no limit Texas Hold'em, I apply probability theories and game theory to beat opponents. I have competed in tournaments - my best result winning first place out of a pool of 250 players.

I am a collaborative and dependable team member who understands the importance of working effectively toward shared objectives. I actively seek opportunities to learn and grow my knowledge, taking satisfaction in continuous improvement and progress in the quality of my work. I am now seeking a role with greater responsibility, where I can apply and further develop my strengths in problem-solving, communication, and technical analysis - and passion for financial markets - to contribute meaningful value to the organisation.
